PORTFOLIO WEBSITE / LINKEDIN

PROFILE

Full-stack developer with a primary focus on frontend. 2+ years building production apps in React, Next.js, and TypeScript, plus backend work in PHP/WordPress, Express, and PostgreSQL. Ships features end to end, from Figma handoff through deploy.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, PHP, HTML5, CSS3/SCSS
- **Frameworks/Libraries:** React, Next.js, Tailwind CSS, React Query, Redux Toolkit (RTK), shadcn/ui, Ant Design, Node.js (Express), Framer Motion, Jest/Vitest
- **Tools/Cloud:** Git, GitHub, Figma (design & handoff), AWS, Vite, Docker, WordPress
- **Databases:** Supabase, PostgreSQL

EXPERIENCE

Full-Stack Developer (DevsData Tech Talent LLC - IT Recruitment) **Jul 2025 – Jul 2026**

- Delivered Figma-to-production features, cross-browser/mobile fixes, and section reworks balancing performance against visual quality across a large WordPress marketing site.
- Automated the Google Docs to WordPress article publishing pipeline with custom PHP plugins, using post-meta guards and hook lifecycle ordering for safe, idempotent content transforms.

Frontend Developer (Part-time at Kutaisi International University) **Nov 2025 – Jun 2026**

- Drove the split of admin and public into separate Next.js route groups with independent layouts, then built the admin CMS on that structure: a Lexical rich-text editor with inline images and a flexible content-block system, article create/edit/approval flows, and Zod-validated forms.
- Delivered full English/Georgian localization across the admin and public site, with live preview language switching and locale-aware date formatting.

Full-Stack Developer (Freelance) - Simpler AI **Aug 2025 – Oct 2025**

- AI Customer Support Platform (Simpler.ge): Built the retrieval and messaging layer of a multi-tenant support chatbot, including a pgvector RAG pipeline with PDF ingestion and tuned relevance thresholds, message deduplication, conversation threading, human takeover, and integrations across Facebook, Messenger, WhatsApp, and an embeddable web widget.

Full-Stack Developer (Freelance) - EV Car Charger **Dec 2024 – Mar 2025**

- EV Charger E-commerce (evcarcharger.ge): Built and shipped a live storefront processing real orders, integrating BOG and TBC payment gateways with order persistence, customer-facing status tracking, and an admin fulfillment flow. Trilingual across Georgian, English, and Russian, covering both UI strings and Supabase-stored product content.

Teaching Assistant – Web Development **Sept 2023 – Jan 2024**

- Mentored students in HTML, CSS, JavaScript, and React fundamentals through assignments and hands-on exercises.

EDUCATION

B.Sc. in Computer Science (Management Minor) **Sept 2022 – Present**

Kutaisi International University - Expected graduation: Feb 2027

Relevant coursework: Web Development (HTML/CSS, JavaScript, React), Java Programming, Cloud Computing (AWS), Databases (PostgreSQL, MongoDB), Software Engineering (Agile/Scrum, Waterfall), Full-Stack Development (React, TypeScript, Express.js, testing with Jest/Mocha)
